                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     1141 Generation and initial analysis of more than 15,000 full-length
human and mouse cDNA sequences

NELL Proc. Natl. Acad. Sci. U.S., 39 (26), 16899-16903 (2002) PRI 07-0CT-2003 Clone distribution: MGC clone distribution information can be found through the I.M.A.G.E. Consortium/LLNL at: http://image.llnl.gov Series: IRAK Plate: 50 Row: g Column: 21
This clone was selected for full length sequencing because it passed the following selection criteria: matched mRNA gi: 20302151.

NEDO CDNA sequencing project supported by Ministry of Economy,
Trade and Industry of Japan; CDNA full insert sequencing: Research
Association for Biotechnology (RAB); CDNA ilbrary construction:
Helix Research Institute (HRI) (supported by Japan Key Technology
Center etc.); 5'- & 3'-end one pass sequencing: RAB, HRI, and
Biotechnology Center, National Institute of Technology and
Evaluation; clone selection in for full insert sequencing: HRI and
RAB; annotation: HRI and RAB.
